FARMER IS RIGHT

New York — I believe CORE's director, James Farmer, is right in contending that there's more than meets the eye in the assassination of Malcolm X.

I believe his murder is a part of an international plot. After all Malcolm X had made several trips to Arab lands which are in a cold war with Israel.

And he had also been in Africa where he deplored the efforts of Red China to muscle in on those newly emerging countries.

President Johnson should have the CIA look into this phase of this horrible crime.
